Operational

Hungarian Radio Press

REFERENCE: MSG 1742

1. The Hungarian Radio Press should not be evaluated or reported on by USARP, and by all means try to keep him out of the press evaluation field. If the publications you list contain information of operational value, they can be obtained and evaluated through our own channels.

2. We shall be interested in hearing whether USARP merely offered to perform this press service for our benefit or whether he regards it as necessary to his work. We would like the actual evaluation - USARP himself or one of his Hungarian contacts.
